

The following enhancements are tentatively scheduled to take place during the week of **November 3<sup>rd</sup>**:

### 1. Optional Exposure Codes:

To facilitate the review process, DCPF has implemented an update to Trust Online. A new field labeled "[Trust] Specific Code" has been added to the Exposure page, which is displayed directly below the Site field. The purpose of this field is to allow firms the ability to add a specific Trust Code to their respective claims. This new field has the same functionality as the Site field but does not carry across linked claims.

### New Claim Submission - Linked Claim Set:

A Specific Code may be added when the original selected Site Code does not apply to the linked claim(s). To add a Specific Code, click on the red button with the ellipsis and select the site. See image below.

**1. Site/Plant/Ship where Exposure Occured**

**Site**  
If the site is on the approved B&W site list, enter the Site Code from Exhibit A (available on website):

33004488 ...  
\*(33004488 - M0034529) BETHLEHEM STEEL CO - SPARROWS POINT, MD

**BW Specific Code (Optional):**

...

If a Trust Specific code is selected, it will not appear on any other linked claim(s), unlike the original Site code which carries across all linked claim(s).

### Submitting and linking multiple Trust claims:

On the initial claim of a linked claim set, simply add the Site on the exposure page as usual (See image above). After submitting the multiple linked claims, then the user may edit the linked claim(s) Exposure page to add the specific code if necessary, by adding the code in the new field labeled "[Trust] Specific Code". See image below.

**1. Site/Plant where exposure occurred**

**Site**  
(If this site is on the approved AWI site list, enter the Site Code from Exhibit A, available on website. If a Site Code is entered, please skip to question 2.)

M0034529 ...  
(M0034529) BETHLEHEM STEEL CO - SPARROWS POINT, MD The site is not approved for this trust. Modifying the site impacts linked claims.

**AWI Specific Code (Optional)**

15000190 ...  
(15000190 - M0006559) BETHLEHEM STEEL CORPORATION - SPARROWS POINT SHIPYARD - BALTIMORE, MD

### Converting and linking multiple Trust claims:

When converting and linking a claim, the source claim Site code will carry across to the target claim; therefore, the user will need to add a specific code to the target claim if the Site code from the source trust does not apply to the target trust. See image below.

**1. Site/Plant where exposure occurred**

<b>Site</b> (If this site is on the approved USG/A.P. Green site list, enter the Site Code from Exhibit A, available on website. If a Site Code is entered, please skip to question 2.)	<input type="text" value="M0034529"/> <span>...</span> (M0034529) BETHLEHEM STEEL CO - SPARROWS POINT, MD The site is not approved for this trust. Modifying the site impacts linked claims.
<b>USG Specific Code (Optional)</b>	<input type="text" value="60000636"/> <span>...</span> *(60000636 - M0002363) BETHLEHEM STEEL - SPARROW POINT, MD

**2. Process Option Changes:**

Trust Online has been updated to allow linked claims to have different process options. Law firms can now have Expedited Review (ER) claims and Individualized Review (IR) claims linked for the same claimant.

With this new enhancement, on the initial submission of a linked claim set, the process option will carry across all claims, but future edits of the Process Option on one claim will no longer carry across to the linked claim set. See image below.

**Finish Claim**

**Comments:** Add Comment

If you intend to submit this information to multiple Trusts, please check the appropriate boxes below. This will link the claims. Updates to this claim will be automatically applied to all its linked claims. Claims do not have to be linked but doing so will allow updates and review decisions to be applied to all linked claims. Claims can be unlinked at any time. However, once claims are unlinked, they can not be re-linked in the future and all future responses must be submitted separately. In addition, review decisions will no longer be carried over between unlinked claims.

*\* As of 11/04/2008 the claim Process Option does not carry across linked claims. Process Option changes must be made on a trust by trust basis.*
