

## **Trust Online Enhancements**

The following enhancement to Trust Online is tentatively scheduled for Monday, March 22, 2010:

### **Claim Conversion Enhancement**

The conversion process has been modified to allow users to convert claims from one Trust to the same Trust to create a new target claim.

- Second Injury Claims – a previously submitted source claim can be converted to a new target claim for the same claimant. This previously restricted feature will allow firms to submit Second Injury claims by converting from the original non-malignant claim.

If the alleged injury of the target claim is not a progression from the source claim's alleged injury, the conversion will result in both claims being placed on Duplicate Hold.

- Previously Withdrawn Claims – a claim that was withdrawn can now be converted to a new claim within the same trust. This new feature will allow firms to convert information from a withdrawn claim to a new claim rather than submitting a new claim manually.

**Note:** This enhancement will also be available for the Bulk Upload Tool.

Target Trust **B&W** (Convert claim/s to this Trust)

Last Name  Claim Number  Attorney [Show List](#)

SSN  Firm File Number  Deficiency Count **All** ▼
